

# Contents

<b>1. The Epidemiologic Approach to Disease: General Purposes, Content, and Reasoning</b>	<b>3</b>
A. General Purposes of Epidemiological Studies	3
B. Content of Epidemiological Activity	9
C. The Sequence of Epidemiological Reasoning	13
D. Example of an Epidemiological Approach	15
<b>2. Some Historical Aspects</b>	<b>20</b>
A. Development of Vital and Health Statistics	22
B. Application of Epidemiological Reasoning to Specific Disease Problems	23
C. Experimental Epidemiology in Human Population Groups	27
<b>3. Selected Epidemiological Concepts of Disease</b>	<b>32</b>
A. Agent, Host, and Environment	32
B. Classification of Human Infections by Mode of Transmission	34
C. The Incubation Period	35
D. Spectrum of Disease	46
E. Herd Immunity	48

<b>xii</b>	Contents	
<b>4.</b>	Mortality Statistics	51
A.	Introduction	51
B.	Classification of Cause of Death	52
C.	Measures of Mortality	57
<b>5.</b>	Epidemiological Studies of Mortality	66
A.	Distribution of Mortality in Populations	66
B.	Limitations of Official Mortality Statistics	104
C.	Studies of Autopsy Series	105
<b>6.</b>	Morbidity Statistics	112
A.	Sources	112
B.	Morbidity Surveys	115
C.	Measurement of Morbidity	116
D.	Morbidity Surveys—Some Issues and Problems	124
E.	Record Linkage	138
<b>7.</b>	Epidemiological Studies of Morbidity	143
A.	Time	143
B.	Place	146
C.	Time and Space Clusters	151
D.	Persons	153
<b>8.</b>	Retrospective and Cross-Sectional Studies	164
A.	General Description of Method	164
B.	The Selection of Cases and Controls	167
C.	Methods of Measuring Association in Retrospective Studies	179
<b>9.</b>	Prospective Studies	194
A.	General Description of Method	194
B.	Types of Prospective Studies	196
C.	Study Procedures	209

D. Analysis of Results	211
E. Advantages and Disadvantages of Prospective Studies	212
F. Prospective Versus Retrospective Studies	214
<b>10. Experimental Epidemiology</b>	<b>218</b>
A. Animal Experiments	218
B. Randomized Controlled Studies in Human Populations	222
C. Types of Controlled Studies in Man	228
D. Studies of Methods of Delivery of Health Care	230
<b>11. Theoretical Epidemiology</b>	<b>233</b>
A. Epidemic Theory	234
B. Age-Specific Prevalence of Certain Serological and Skin Tests	237
C. Age-Specific Incidence Curve of Cancer in Man	239
<b>12. Derivation of Etiological Hypotheses from Epidemiological Studies</b>	<b>247</b>
A. Hypotheses Based on Statistical Relationships	247
B. Methods of Distinguishing Between Hypotheses	253
C. General Comment	268
