EDITOR'S INTRODUCTION

- Inferring Causal Connections—Habit, Faith or Logic?* 3
Kenneth J. Rothman

THESIS

- Causal Criteria and Popperian Refutation* 15
Douglas L. Weed
- Falsification, Verification and Causal Inference in
Epidemiology: Reconsideration in the Light of Sir Karl
Popper's Philosophy* 33
Mervyn Susser
- The Logic of Causal Inference* 59
Stephan F. Lanes
- Scientists and Philosophy* 77
George N. Schlesinger

COMMENT

- Probability versus Popper: An Elaboration of the Insufficiency of Current Popperian Approaches for Epidemiologic Analysis* 95
Sander Greenland
- Inference in Epidemiology* 105
Michael Jacobsen
- X *Epidemiologic Inference* 119
Darwin R. Labarthe and Reuel A. Stallones
- Refutation in Epidemiology: Why Else Not?* 131
Malcolm Maclure
- X *The Truth, The Whole Truth and Nothing but the Truth?* 139
Neil McIntyre
- The Implication of Alternative Views About Causal Inference for the Work of the Practicing Epidemiologist* 149
Diana B. Petitti
- Induction Does Not Exist in Epidemiology, Either* 153
Charles Poole

REJOINDER

- There's a Fascination Frantic in Philosophical Fancies* 165
George N. Schlesinger
- Error and Uncertainty in Causal Inference* 173
Stephan F. Lanes
- Rational Science versus a System of Logic* 189
Mervyn Susser
- Criticism and Its Constraints: A Self-appraisal and Rejoinder* 201
